

impressipes

Impressipes brand (IMP-13)

Impress + recipes. A warm, cute family app for recipes and shopping lists. The pie mascot from IMP-19 is the mark, rhubarb pink from IMP-14 is the accent, Nunito 800 is the wordmark.

- **Name:** Impressipes, written `impressipes` in the wordmark and “Impressipes” in sentence text. Domain `impressipes.bancroft.io`.
- **Mark:** the pie mascot, hello face, leaf at 1 o’clock. Below 48 px it becomes the small mark: no face, a lattice, 12 big scallops.
- **Colour:** rhubarb `#C62F55` filling and mustard crust on cream `#FFF8F0`; `#FF8DA5` and `#CFA52E` on `#1A1512` in dark. No new colours.
- **App icon:** pie on cream for iOS and watchOS; dark and tinted variants for iOS 18. The watch circle crop keeps the whole pie.
- **Web:** SVG favicon that follows the colour scheme, ICO and PNG fallbacks, apple-touch-icon, manifest icons, 1200 × 630 OG image.

Personality and voice

Who the app is when it talks. The pie shows up to cheer or console, never to decorate. Copy is short and plain.

Warm

A home kitchen, not a restaurant. Family names, real food, cream paper and brown ink.

Do “Sam added 3 things to Costco.”

Don’t “Your collaborative list has been updated.”

Playful, quietly

The pie appears in empty, done, offline and error states. It is never on a busy screen, never a pattern, never in the way of the list.

Do “All done. Nothing left to get.”

Don’t “Woohoo!! 🎉🎉 You crushed it!!!”

Plain-spoken

Short words, sentence case, verbs on buttons. One exclamation mark at most, and only to celebrate.

Do “Add to list” · “Try again”

Don’t “Proceed” · “An unexpected error has occurred”

Tagline

Recipes to impress.
One shopping list for the family.

Used on the OG image and sign-in. Two lines, the second is the useful one.

Naming in copy

- “Impressipes”, capital I, in sentences and the App Store.
- Never “Impressipies”, “ImpressiPes” or “the Impressipes app”.
- The mascot has no name in the UI. It is “the pie” in docs and alt text.

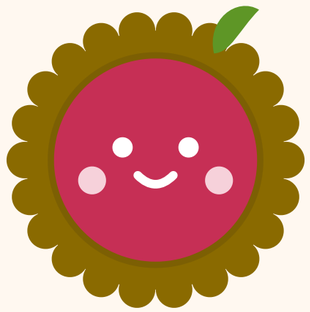

Type

impressipes

Wordmark and titles: Nunito 800 on web, SF Pro Rounded Heavy on Apple. Everything else is system text (IMP-14).

The mark

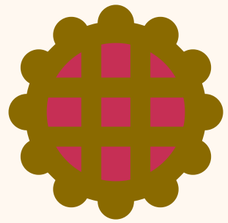

One pie, two sizes. The primary mark is the IMP-19 mascot unchanged. The small mark drops the face and adds a lattice, which answers the IMP-19 worry that the scalloped crust reads as a flower at 32 to 40 pt.

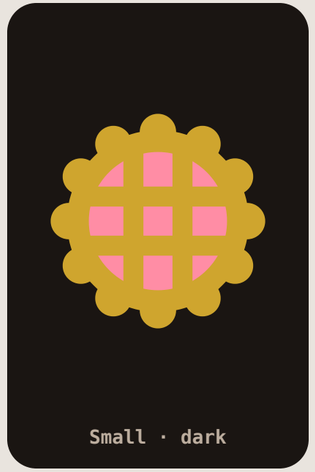

Primary · light

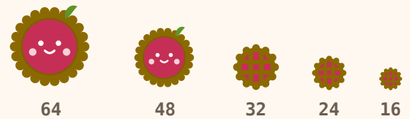

Primary · dark

Small · light

Small · dark

primary ≥ 48 · small < 48

Construction

- Crust: mustard, 22 scallops (small: 12).
- Filling: accent, with a 14% ink rim for depth.
- Face: on-accent eyes and smile, accent-soft cheeks.
- Leaf: leaf colour, at 1 o’clock, never moves.

Clear space and minimums

- Clear space: one filling radius (40 units) on every side.
- Primary mark minimum 48 px; small mark 16 px.
- Lockup minimum 120 px wide.

Don’t

- Recolour outside the tokens, or put the pie on rhubarb (the filling disappears).
- Rotate, tile, crop or outline it.
- Change the face in the logo. Other faces belong to empty states only.

Wordmark and lockups

Lowercase `impressipes` in Nunito 800, ink colour, tracking −1. The pie sits left of the word in the horizontal lockup and above it in the stacked one.

Horizontal · light

Horizontal · dark

Stacked · light

Stacked · dark

Colour and contrast

ink on bg	`#2B2118`	15.0:1, wordmark light
ink on bg (dark)	`#F7EEE4`	15.8:1, wordmark dark
mustard on bg	`#8A6A00`	4.8:1, crust edge light
mustard on bg (dark)	`#CFA52E`	7.8:1, crust edge dark
accent next to mustard	`#C62F55`	filling vs crust 1.1:1, so the ink rim and hue keep them apart

The accent is unchanged from IMP-14, so the p3 contrast table still holds.

App icons

One 1024 px master per appearance; Xcode makes the rest. The pie sits slightly left and low so the leaf balances the top right. No text, no rhubarb background.

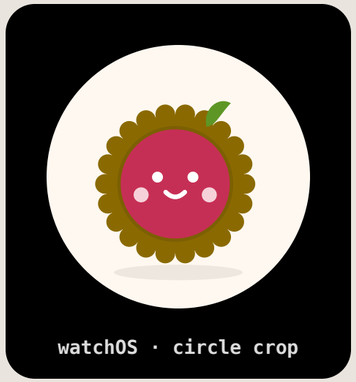

iOS · Any

iOS · Dark

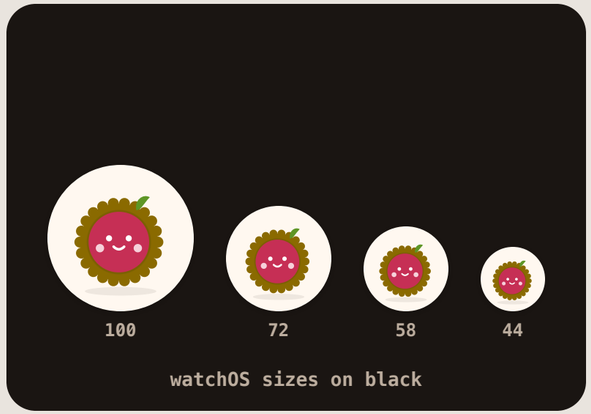

iOS · Tinted (grayscale)

watchOS · circle crop

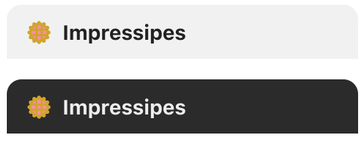

iOS sizes from the master (180 home, 120 spotlight, 87 settings, 60, 40, 29)

watchOS sizes on black

Web: favicon, home-screen icon, OG image

The SVG favicon switches to the dark values with the browser theme. ICO and 32 px PNG are fallbacks. The OG image is light only.

Browser tabs, light and dark

apple-touch-icon 180, manifest 192 / 512

og.png, 1200 × 630

Head tags

```
<link rel="icon" href="/favicon.ico" sizes="32x32">
<link rel="icon" href="/favicon.svg" type="image/svg+xml">
<link rel="apple-touch-icon" href="/apple-touch-icon.png">
<link rel="manifest" href="/site.webmanifest">
<meta name="theme-color" content="#FFF8F0">
<meta property="og:image" content="…/og.png">
```

Manifest

- `name` and `short_name`: Impressipes
- `background_color` and `theme_color`: `#FFF8F0`
- Icons 192 and 512, plus 512 maskable (the pie fits the 80% safe circle).

Sign-in and invite

The web placeholder mark (an “I” on indigo) is replaced by the primary mark at 56 px above the title. IMP-30 builds those screens.

Handoff

Every file is generated by `designs/imp-13/brand.mjs` and rendered by `render.sh`. Change the generator, not the files.

designs/imp-13/export/

- `mark-{light,dark}.svg/png`, `mark-small-{light,dark}.svg/png`
- `lockup-{light,dark}.svg/png`, `lockup-stacked-{light,dark}.svg/png`
- `og-light.svg`, `og.png`
- `AppIcon.appiconset/` (iOS: Any, Dark, Tinted)
- `WatchAppIcon.appiconset/` (watchOS)

Where they go

- **IMP-27** (XcodeGen): copy the two appiconsets into each target's `Assets.xcassets` as `AppIcon`. Both targets already set `ASSETCATALOG_COMPILER_APPICON_NAME = AppIcon`.
- **IMP-44** (web shell): favicon, icons, manifest and OG tags are already in `apps/web`. Self-host Nunito 800 there for the wordmark.
- **IMP-30, IMP-31**: primary mark above sign-in and invite titles.

Open

- The code still says “Impressipies” (bundle IDs, passkey RP name, web titles, Xcode targets). IMP-28 plans `io.bancroft.impressipes`; rename with it.
- The SVG wordmark uses live Nunito text pinned with `textLength`. Convert it to outlines once Nunito is self-hosted (IMP-44).
- Check the small mark and the 29 pt icon on a device in IMP-12 round 2.
